

GM Egypt Upgrades Traffic Safety on the Road

In an initiative to upgrade traffic safety on Egypt roads, GM Egypt donated two vehicles to the General Authority for Roads and Bridges in order to enable traffic governance and assistance on the road.

The handing out ceremony took place on Monday March 1, 2010 and was attended by Minister of Transportation, Alaa Fahmy and the President of the American Chamber, Gamal Moharram.

The initiative was kicked off last year and was championed and launched by The American Chamber of Commerce with the help of active members of the AmCham.

GM Egypt also plays a key role in the Transportation Committee at the American Chamber and is constantly reviewing all opportunities for valuable contributions that aim at lifting-up the living standards and conditions of the Egyptian people.
